GUEST SPEAKER

JIM LAURIE

A distinguished international broadcaster, writer and media consultant who has witnessed defining moments in Asia's history for more than 50 years, Jim Laurie first visited Japan as a young writer/reporter in 1970 before embarking as a war correspondent in Indochina. He served as ABC News bureau chief in Tokyo in the late 1980s. Laurie's Emmy Award-winning documentary film, "Myths Behind the Miracle," examined Japan's economic success in the late 20th century and some of the social reasons that it could not be sustained.

Serene Landscapes

Japan is well-known for its distinctive peaceful gardens, imbued with symbolism. Japanese gardening customs are rooted in two traditions: a prehistoric practice of maintaining pebbled patches and dedicating them to nature spirits; and designs imported from China centuries ago that included water, rock and plant elements. We will visit two of Japan's greatest landscape gardens—Kenroku-en, in Kanazawa, and Koraku-en, in Okayama—and stop at other sites with notable greenscapes, including the Adachi Museum of Art. As you immerse yourself in the understated, elegant landscapes, look for the five notable design principles of Japanese gardening: asymmetry, enclosure, borrowed scenery, balance and symbolism. These gardens are not meant to be seen all at once but one vista at time, like a series of scenes unfolding. Contemplate the rock garden at Ryoan-ji, Kyoto's Temple of the Peaceful Dragon, founded in 1450. This garden, one of the most famous in the world, represents the ultimate expression of Zen Buddhism. Legend says that only 14 of the 15 rocks in the garden can be seen at once, and only when one attains spiritual enlightenment does the final stone reveal itself.
